THE TINDERBOX COLLECTION

Designed in Britain

Mi eco EcoDesign Ready 2022

SIA ecodesign ready

Designed and assembled in the UK | ECODesign 2022 ready

Over 80% efficient | Energy Rating A+ | Smoke Control Exempt | Low Dust

Lifetime warranty on the body of the stove | Suitable for a decorative hearth

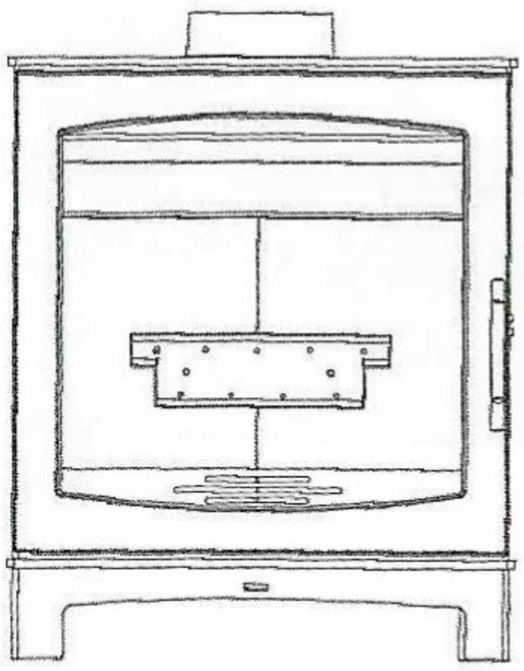
---

Key features include a thick steel seam welded stove body with a lifetime warranty. The modern curved design cast iron door is fitted with discretely recessed hinges and a nero black handle. The firebox is lined with 30mm thick vermiculite panels, and the stainless steel single air slider allows you to easily control the combustion of your stove. The powerful tertiary air system is central to the stoves efficiency and cleanliness. Pre-heated air is drawn into the fire chamber and injected into the path of the gases produced during primary combustion; this re-ignites the gases resulting in a significantly cleaner and more efficient fire.

Born and Bred in the Lake District, these British-designed wood-burning stoves are Eco Design 2022 ready ensuring the highest standards of efficiency and cleanliness. The curved cast iron door frame and large window provide a stunning view of the fire, and the powerful air wash system works to continuously clear any combustion deposits. With three window sizes to choose from, there is a model to suit every room and fireplace opening, and will truly be the focal point of any home.

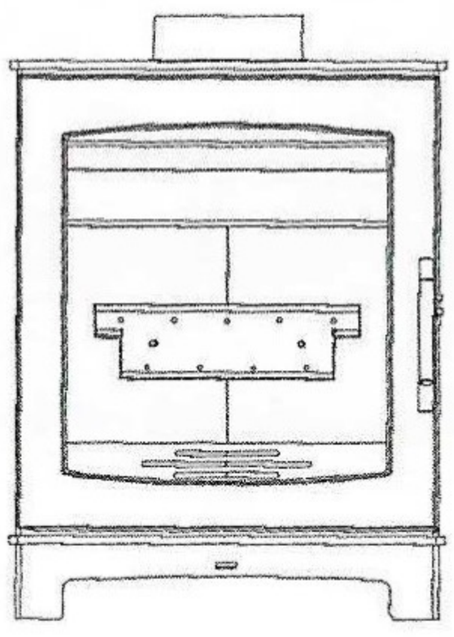
Designed in the UK and using the latest technology all models have an A+ Energy Rating together with the lowest production of harmful dust particles meaning they are amongst the most efficient stoves currently available in the UK.

Tinderbox Large



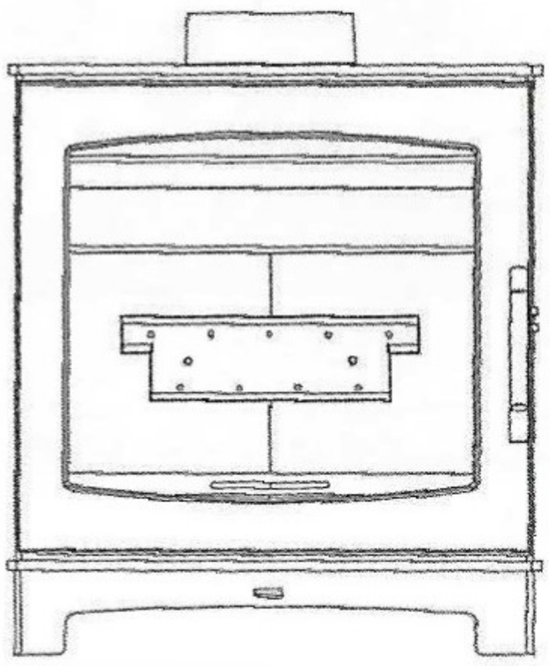
Width: **490mm**
Height: **590mm**
Depth: **332mm**
Output: **5kW**
Efficiency: **80.4%**
Weight: **76kg**
Flue Size: **125mm**
Energy Rating: **A+**

Tinderbox Medium



Width: **410mm**
Height: **530mm**
Depth: **330mm**
Output: **5kW**
Efficiency: **85.1%**
Weight: **64kg**
Flue Size: **125mm**
Energy Rating: **A+**

Tinderbox Small



Width: **446mm**
Height: **494mm**
Depth: **332mm**
Output: **4.9kW**
Efficiency: **82.7%**
Weight: **65kg**
Flue Size: **125mm**
Energy Rating: **A+**
